

# IDENTITY

**21 JANUARY-13 MARCH**

Identity is the way we perceive and express ourselves. Many factors throughout our lives will define our identity such as ethnic origin, heritage or culture. But identity is something that is fluid and is subject to change.

This showcase presents artists from across the globe who explore the ever changing nature of identity, sparking conversations on history, politics, gender, and contemporary approaches. The work will express, explore, and question ideas about identity across all cultural boundaries.

Together, these artists offer a unique perception of the self we present to the world, raising the question: Is Identity how we see ourselves or how others see us?
